

Here is an example of needed repairs that have not been undertaken by DRI.

The damage happened in Jan 2008 and these pictures were taken in the summer of 2009.

As of Jan29/10, and despite repeated requests, the repairs are still not even started over 2 years later.

According to a recent owner that stayed in this building, birds have now nested in the open soffits.

Pictures as of Aug 29/09. Building 3
